Job Title: AI/ML Engineer – Fresher

We are looking for an enthusiastic AI/ML Engineer to join our team in Bangalore.

Responsibilities:

- Work on machine learning and deep learning model development.
- Assist in building and deploying NLP and computer vision models.
- Perform data preprocessing, feature engineering, and model evaluation.
- Collaborate with senior engineers to develop scalable AI pipelines.

Required Skills:

- Strong Python programming knowledge.
- Familiarity with machine learning algorithms (regression, classification, clustering).
- Basics of deep learning using TensorFlow or PyTorch.
- Understanding of NLP concepts such as embeddings, transformers, and sentiment analysis.

Location: Bangalore

Experience: 0–1 years
